## SUMMARY

From building and modifying computers, fixing laptops, writing scripts, to setting up small-scale networks, I have a keen interest in all types of technology. Over the past few years while working as a translator, I have been studying technology in my own time and I have gained certification for CompTIA A+ as well as Harvard University's CS50 online course. I write small programs and scripts, and I've made small scale websites, games, and tools, including some that were put to use my translation job.

People describe me as approachable, open-minded, and easy to get along with. I enjoy problem-solving, even if the solution is not immediately apparent or more research is needed. My past experience as a teacher has helped me gain communication skills and the ability to explain complicated things in a way that is easy to understand. In my recent role as a translator in Japan, I demonstrated attention to detail, research skills, and the ability to write and reference documentation.

## EMPLOYMENT

### Translator at Active Gaming Media, Osaka

2016 — 2021

- Provided Japanese to English translations for world-famous IPs and brands
- Wrote scripts and tools to improve efficiency and workflow within the company
- Created and maintained company documentation and manuals
- Helped manage and train small teams of people

## EDUCATION, COURSES, AND CERTIFICATION

### Bachelor of Arts - Applied Language and Linguistics, Griffith University

2008 — 2010

### CS50 Computer Computer Science (Online), Harvard University

2016
