## 👤 SUMMARY

With a passion for Javascript, I currently work as a junior developer, developing front-end websites and web-apps with a focus on interactivity technology within the browser. I started to learn development as a hobby while living and working in Japan as a translator. After returning to Australia I joined Spatial Media in supplying custom solutions for clients to engage their audience in revolutionary ways.

People would describe me as pro-active, approachable, open-minded, and easy to get along with. I enjoy problem-solving and finding new solutions to an issue. My past experience overseas taught me communication skills and the ability to explain complicated things in a way that is easy to understand.

I'm looking to continue my growth as a developer and I'm focused on expanding my own skill-set. I'm currently learning node.js and react while expanding my skills to back-end programming and full-stack web development.

## 💼 EMPLOYMENT

**Translator at Active Gaming Media, Osaka**

2016 — 2021

- Provided Japanese to English translations for world-famous IPs and brands
- Wrote scripts and tools to improve efficiency and workflow within the company
- Created and maintained company documentation and manuals
- Helped manage and train small teams of people

**Junior Web Developer at Spatial Media, Australia**

September 2021 — Present

- Develop front-end websites using HTML, CSS, JS and basic PHP that serve custom WebGL-driven (Mapbox) maps with unique datasets
- Handling complex GIS data and optimising it for display on the web through Mapbox and other tools
- Follow documented git and agile-inspired workflows, including daily check-ins on Slack and documenting, committing, and updating issues on Github
- Assist with developing internal documentation, bug fixing and QA testing

## 🎓 EDUCATION, COURSES, AND CERTIFICATION

**Bachelor of Arts - Applied Language and Linguistics, Griffith University**

2008 — 2010

**CS50 Computer Computer Science (Online), Harvard University**

2016

**A+ Certification, CompTIA**

2019
